

**ALFA CARE**

# Eis-Gel

**BE COOL!**

**AlfaCare Eis-Gel** is one of our best sellers. Eis-Gel is applied on sore and tender muscles. It's a universal product that should be found in every medicine cabinet, at home, at school, at your work place, in your car and in conjunction with physical activities. Try it!  
The process is as easy as it is brilliant: The gels cooling effect gives local stimulation to your skin, which releases a stimulating blood supply deeper in the muscle tissue under the area you apply the gel. This makes the tissue softer and more agile, which leads to pain relief. It's not an artificial "stimulation", but more of an activator of your body's healing process. Because of the gels fast-acting effect it has a huge field of application.

**Eis-Gel** is a gelatinous product lubricated directly to the skin as needed.

**Eis-Gel** immediately gives a cooling and soothing effect.

**Eis-Gel** is not transmitted and staining.

**Eis-Gel** belongs in every home, at work, in the car and not least in sport and leisure.

**Eis-Gel** is a universal product.

**Eis-Gel** is recommended by physiotherapists and chiropractors.

**How to use Eis-Gel:** Apply directly to skin on the troubled area. Can be applied to both dry and moist skin, but gives maximal effect when applied on moist skin. Use Eis-Gel until you feel better. Eis-Gel is also suitable for massage. It can be applied as often as needed and on all body parts.

**Warning:** Do not apply Eis-Gel to your eyes or in open wounds. Store unavailable for children.
